

AMENDMENTS TO THE SPECIFICATION

A marked-up version of the amended portion of the specification showing the amendments made herein follows. Matter that has been deleted from the specification is indicated by strikethrough and matter that has been added is indicated by underlining.

Please amend the specification as follows:

Please replace the final paragraph on page 7 of the specification with the following:

It is also possible to use the actual simulator beam 4 as the alignment beam 6 by allowing the normally invisible simulator beam 4 to hit a wavelength converter which converts the simulator beam 4 to visible light. It can be particularly appropriate to use a wavelength converter material (30) as a projection screen (not shown) in the collimator in cases in which a collimator is used to return the simulator beam, the wavelength converter then generates a visible mark that specifies the direction in which the simulator beam exits from the simulator.

Please find attached a substitute sheet showing amended Fig. 8, wherein the new reference number 30 is indicated.
